we jammed at parties... had fun...
played different gigs together... had more fun... decided to play and write some music together... the rest has
evolved as though it was meant to, which has been
a good sign...

the music we play, write and listen to always seems to be nudging and winking... reflecting back and reminding us of
our own humanity... we both have a sense that music should in some way be about bringing people together and
allowing them to feel good... but also in some way should be about shifting people's perceptions of themselves and
the world they live in just that little bit... we hope that the music on this CD represents these sentiments and in
some way offers these possibilities to our listeners.
